

2017 Uninstall & Removal Guide

TITLE:	2017 Uninstall & Removal Guide
DATE:	September 2016
SUBJECT:	SOLIDWORKS clean uninstall and removal guide
ABSTRACT:	Guide to performing a complete uninstall/removal of SOLIDWORKS.

This guide is written for SOLIDWORKS 2017. If you are using an earlier version of SOLIDWORKS, please download our earlier documents.

This information is subject to change without notification. Please make sure you are using the most current version of the document. If you have any questions or find that there are discrepancies between this document and the SOLIDWORKS website or documentation, please contact [Hawk Ridge Systems technical support](#).

If you are experiencing serious issues with your SOLIDWORKS software, you may need to fully uninstall the program and all associated programs and files before attempting to reload the software. This document covers how to do this complete removal of the product.

This is not a troubleshooting guide. If you have any technical issues with SOLIDWORKS, please contact [Hawk Ridge Systems technical support](#).

This document is only to be distributed and used by Hawk Ridge Systems customers. Any other use is prohibited.

Appendix B: Accessing the Registry Editor	13

Saving Files & Settings

Software issues can be caused by your registry settings or support files. It is a good idea to save your settings and files, but you will want to test that your issue is repaired with the default settings before reapplying your customizations.

Before searching for these files please see the [showing hidden folders](#) section of this document.

SOLIDWORKS Data to Save: File Templates, Design Library, Custom Materials and Sheet Formats

If you have changed any of the above items, you will want to make a copy of the folder where these customized items are stored. This gives you the ability to test the functionality of the existing 'default' and 'copied' Toolboxes when SOLIDWORKS is reinstalled.

Make a copy of your data folder and save it in a new, safe location. By default the location is:

C:\ProgramData\SOLIDWORKS\SOLIDWORKS 2017

Toolbox Files

In the event this removal of SOLIDWORKS is a result of a Toolbox issue, it is best practice for you to make a copy of your SOLIDWORKS default Toolbox library. This gives you the ability to test the functionality of the existing 'default' and 'copied' Toolboxes when SOLIDWORKS is reinstalled.

Make a copy of your Toolbox library and save it in a new, safe location. By default the location is:

C:\SOLIDWORKS Data

Flow Simulation Files

In the event this removal of SOLIDWORKS is a result of a Flow Simulation issue, it is best practice for you to make a copy of your Flow Simulation folders. This gives you the ability to test the functionality of the existing 'default' and 'copied' Flow Simulation folders when SOLIDWORKS and Flow Simulation are reinstalled.

Make a copy of your Flow Simulation folder and save it in a new, safe location. The default location for this folder is:

C:\Program Files\SOLIDWORKS Corp\SOLIDWORKS Flow Simulation

CircuitWorks Files

In the event this removal of SOLIDWORKS is a result of a CircuitWorks issue, it is best practice for you to make a copy of your CircuitWorks folders. This gives you the ability to test the functionality of the existing 'default' and 'copied' CircuitWorks folders when SOLIDWORKS and CircuitWorks are reinstalled.

Make a copy of your CircuitWorks folder and save it in a new, safe location. The default location for this folder is:

C:\ProgramData\SOLIDWORKS\CircuitWorks

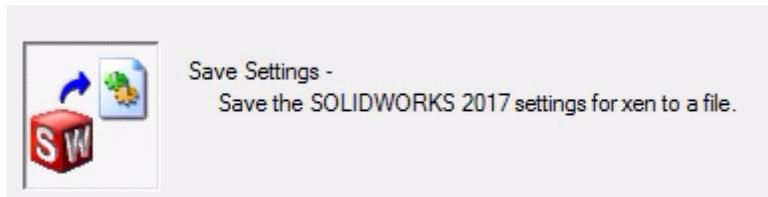

Copy Settings:

You can save your toolbar locations, command changes, keyboard shortcut hotkeys and system options (including file locations). If you want to save these, you will need to save the settings. Once you have reinstalled SOLIDWORKS, it will have the default settings, so you should test if SOLIDWORKS functions correctly before reapplying your custom settings.

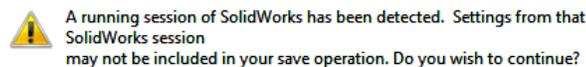

1. Go to **Start, All Programs, SOLIDWORKS 20XX, SOLIDWORKS Tools, Copy Settings Wizard**.

2. Press the **Save Settings** button on the first page and press the **Next** button to continue.

3. If you have SOLIDWORKS open, you will be warned that any changes in the current sessions will not be saved. Close SOLIDWORKS if you want to keep any changes from this current session. Press the **Yes** button to continue.

4. On the following page, you can specify the location and name of your settings file. Press the **Browse** button to search for a save location.

Choose a location and name for the settings file (*.sldreg):

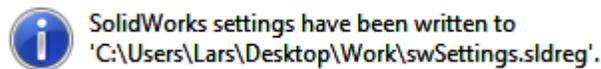

C:\Users\Lars\Desktop\Work\swSettings.sldreg

5. Select the check boxes in front of the customized settings you would like to save.

Save these settings:

- Keyboard shortcuts
- Menu customization
- System options
- Toolbar layout
 - All toolbars
 - Macro toolbar only

6. Press the **Finish** button to save the .sldreg file.
7. You will be informed that your .sldreg file has been successfully saved. Press **OK** to finish.

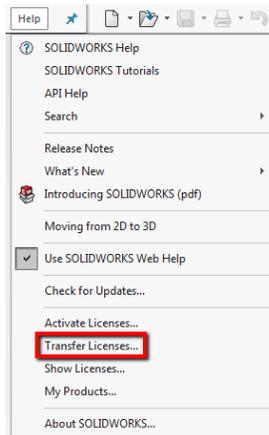

8. You can browse to the save location and see the file. When you want to reset your SOLIDWORKS program to use your customized options, simply double-click this file and the settings will be written to the current user's registry.

License Transfer

1. Go to **Start, All Programs, SOLIDWORKS 20XX, SOLIDWORKS 20XX x64 Edition**.
2. After SOLIDWORKS starts, go to the **Help** pull down and choose **Transfer License**.

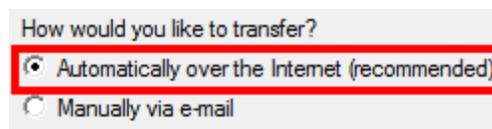

3. If you have more products than SOLIDWORKS activated (Simulation, for example), you will need to choose the product to deactivate.

Note: If you have Simulation Professional or Premium or Flow Simulation, you will need to deactivate these first then deactivate SOLIDWORKS.

4. Choose to activate **Automatically over the Internet**.

5. Press the **Next** button. You will now connect to the SOLIDWORKS Activation site to return the license.

6. You will be informed that the license has been transferred back to SOLIDWORKS.

7. Press the **Finish** button to complete.

SOLIDWORKS will not run on this machine until it is re-activated.

Uninstalling SOLIDWORKS

1. Make sure you are logged in as the administrator.

2. Disable all anti-virus and anti-spyware programs.

3. Go to the **Control Panel** and choose **Uninstall a program**.

4. A list of programs will be displayed. Find **SOLIDWORKS** in the list and select it and press the **Uninstall** button.

Name	Publisher	Ir
NVIDIA WMI 2.20.0	NVIDIA Corporation	4,
PDFCreator	pdfforge	7,
Python 2.7.6	Python Software Foundation	6,
Sentinel Protection Installer 7.6.5	SafeNet, Inc.	1.
SolidWorks 2013 x64 Edition SP05	SolidWorks Corporation	1,
SolidWorks 2014 x64 Edition SP05	SolidWorks Corporation	5,
SOLIDWORKS 2015 x64 Edition SP05	SolidWorks Corporation	1.
SOLIDWORKS 2016 x64 Edition SP04	SolidWorks Corporation	8,
SOLIDWORKS 2017 x64 Edition	SolidWorks Corporation	8,

- The SOLIDWORKS Installation Manager will launch at this time. You will be shown a list of SOLIDWORKS products that are loaded on this system. Select the programs you wish to remove.

Summary

You have chosen to uninstall SOLIDWORKS products.
Select the products that you want to uninstall. Unselected products will remain on the computer.

- SOLIDWORKS 2017
- eDrawings 2017
- SOLIDWORKS Explorer/Workgroup PDM 2017
- SOLIDWORKS Flow Simulation 2017
- PV360 Network Client 2017
- SOLIDWORKS Simulation Worker Agent 2017
- SOLIDWORKS Plastics 2017
- SOLIDWORKS Flow Simulation 2017

Advanced Options [CHANGE](#) 

- To select the types of items to remove from your computer, click **Change** at the Advanced Options line.

Advanced Options

Select the types of items to remove from this computer. Unselected items will remain on the computer.

Program Files and Folders

Program files and folders are removed by the standard uninstall.

Registry Entries

This will remove serial numbers and custom settings from the registry.

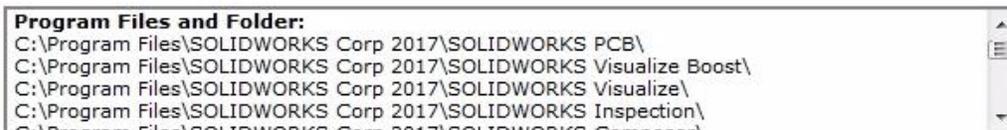

Data Files and Folders

This will delete custom files stored in the data folders, such as Toolbox. It will not delete any files or folder from other locations, other computers, or network locations.

Download Files and Folders

This will delete download files and folders from the original download location. It will not delete renamed or moved download files and folder.

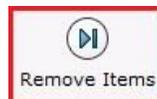

Files and folders that will be removed:

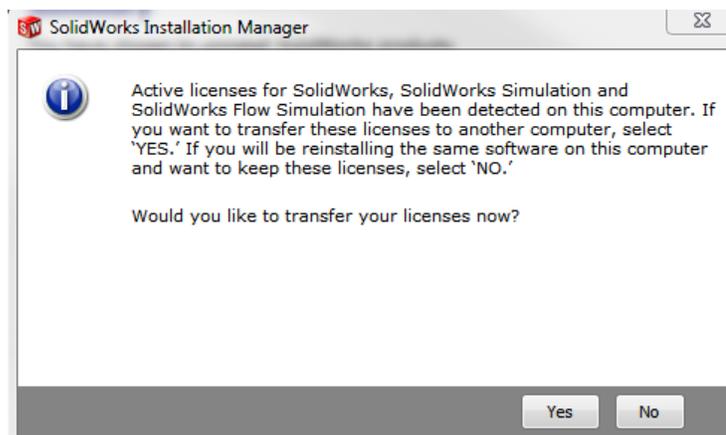

7. Click **Back to Summary** to return and continue.

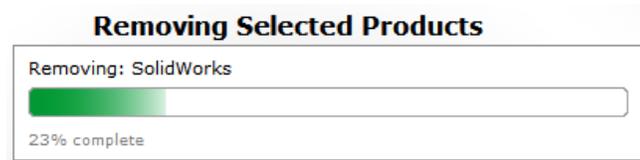

8. Click the **Remove Items** button at the bottom of the screen to continue.

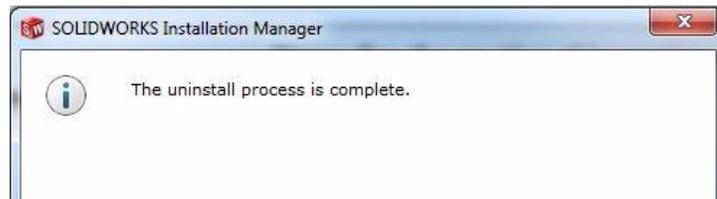

9. If you are using a standalone license and you have not transferred your licenses already, a dialog will appear and allow you to transfer currently activated licenses on the computer.

10. The selected products will now be removed from the system.

11. You will be informed when SOLIDWORKS is completely removed from your machine. Press **OK** to continue.

12. You will now be returned to the remove/uninstall window of the control panel. If you have any older versions of SOLIDWORKS, COSMOS, eDrawings, DWG Editor or SOLIDWORKS Explorer, you will want to remove these as well.

Name	Publisher	Version
 SolidWorks 2011 x64 Edition SP05	SolidWorks Corporation	19.5.0.91
 SolidWorks 2012 API SDK	SolidWorks Corporation	20.40.64
 SolidWorks 2012 x64 Edition SP04	SolidWorks Corporation	20.4.0.64
 SolidWorks Enterprise PDM	SolidWorks Corporation	12.04.0813
 SolidWorks Enterprise PDM File Version Upgrade Utility	SolidWorks	11.01.0613
 SolidWorks SolidNetWork License Manager	SolidWorks	20.20.55
 SolidWorks Workgroup PDM Server 2012 SP04 x64 Edition	SolidWorks Corporation	20.40.64

File & Settings Removal

At this point, the SOLIDWORKS products have been removed from your machine. However, many folders, files and registry keys still remain on your system. If these items were the cause of your software issue, reinstalling the product without removing these will not fix the issue. This section covers how to safely remove all remaining items from your system to fully uninstall SOLIDWORKS.

Enterprise PDM Removal

If your company uses Enterprise PDM (EPDM) for data management, you will need to remove this program from your computer as well. If you do not use EPDM, please go to the next section of this document on [cleaning the registry](#).

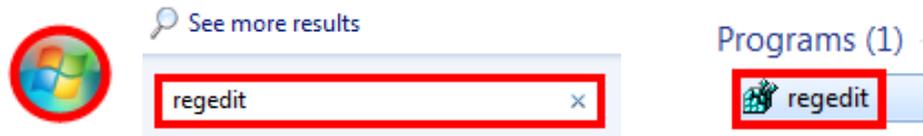

NOTE! Be careful when performing this manual cleanup - this should **ONLY** be used to completely uninstall/remove the client software and registry settings when troubleshooting problems.

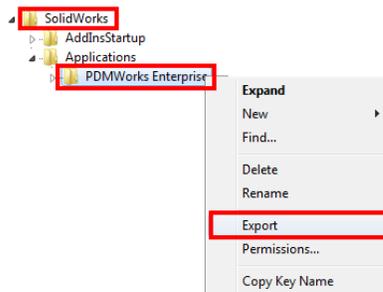

If performing this operation on a system where the archive or database server is installed, your existing file vaults will become unusable as the registry settings are destroyed. If you are uninstalling an Enterprise PDM archive or database server, please contact us at support.hawkridgesys.com or call us (in the U.S. **877-266-4469**; Canadian customers dial **866-587-6803**).

Follow the instruction below to export the EPDM registry keys out before deleting the SOLIDWORKS registry folders. The computer registry is where all information for all your programs is stored. You must **be very careful to only delete the items expressly called out in this document**. Any other items removed from this area may cause your system, or other programs, to not function correctly.

1. Open the registry editor, press the **Windows** button in the lower left corner of the screen and type **regedit** into the search line. Then select the **regedit** program from the search results.

2. Right-click the registry key **HKEY_CURRENT_USER\Software\SOLIDWORKS\Applications\PDMWorks Enterprise** and select **Export** to export the Enterprise registry key.reg file. Save this file to a safe location.

Continue saving .reg files of the following registry keys:

- All platforms:

HKEY_LOCAL_MACHINE\SOFTWARE\SOLIDWORKS\Applications\PDMWorks Enterprise

- 64-bit platforms:

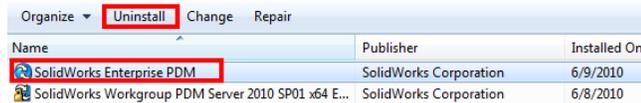

HKEY_CURRENT_USER\Software\Wow6432Node\SOLIDWORKS\Applications\PDMWorks Enterprise

HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\SOLIDWORKS\Applications\PDMWorks Enterprise

3. Go to the **Control Panel** and choose **Uninstall a program**.

- A list of programs will be displayed. Find **SOLIDWORKS Enterprise PDM** in the list and select it. Press the **Uninstall** button.

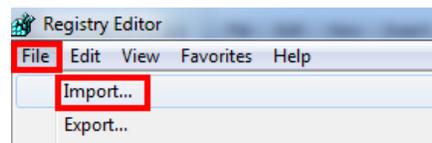

- Go into the registry editor again as in step one of this section. Then delete the following keys:
 - All platforms:

HKEY_CURRENT_USER\Software\SOLIDWORKS\Applications\PDMWorks Enterprise

HKEY_LOCAL_MACHINE\SOFTWARE\SOLIDWORKS\Applications\PDMWorks Enterprise

- Delete any registry entries left under **HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\SharedDlls** That references PDMWorks Enterprise DLLs and executables. Note that the data value indicates how many times a DLL is being shared between different applications.
- Go through all keys under the following registry key and ensure Enterprise PDM is not listed (look for DisplayName):
HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall
- Delete the folder **C:\Program Files\SOLIDWORKS Enterprise PDM** and its contents.
- Delete the folder:
C:\Users\[USERPROFILE]\AppData\Local\SOLIDWORKS\SOLIDWORKS Enterprise PDM.
- Continue to the following sections, [Cleaning the Registry and Folders for SOLIDWORKS](#) and then return to this section.
- Go into the registry editor like in step 1 of this section. Then go to **File, Import** and import the .reg files you saved in step 2 of this section.

- Reboot the machine.

Cleaning the Registry and Folders for SOLIDWORKS

The computer registry is where much of the information for all your programs is stored. You must **be very careful to only delete the items specifically called out in this document**. Any other items removed from this area may cause your system or other programs to not function correctly.

The recommended clean uninstall method is to use the Advanced Options during the uninstallation through the SOLIDWORKS Installation Manager. However, if the system needs to be cleaned manually, the following registry keys and folders can be deleted.

Program Files and Folder:

- C:\Program Files\SOLIDWORKS Corp\SOLIDWORKS Composer\
- C:\Program Files\SOLIDWORKS Corp\SOLIDWORKS Explorer\
- C:\Program Files\SOLIDWORKS Corp\eDrawings\
- C:\Program Files\SOLIDWORKS Corp\SOLIDWORKS\
- C:\Program Files\Common Files\SOLIDWORKS Shared
- C:\Program Files (x86)\Common Files\SOLIDWORKS Shared

Registry Entries:

- HKCU\Software\SolidWorks
- HKLM\Software\Wow6432Node\SolidWorks
- HKLM\Software\SolidWorks
- HKCU\Software\SRAC
- HKLM\Software\SRAC
- HKCU\Software\eDrawings
- HKLM\Software\eDrawings

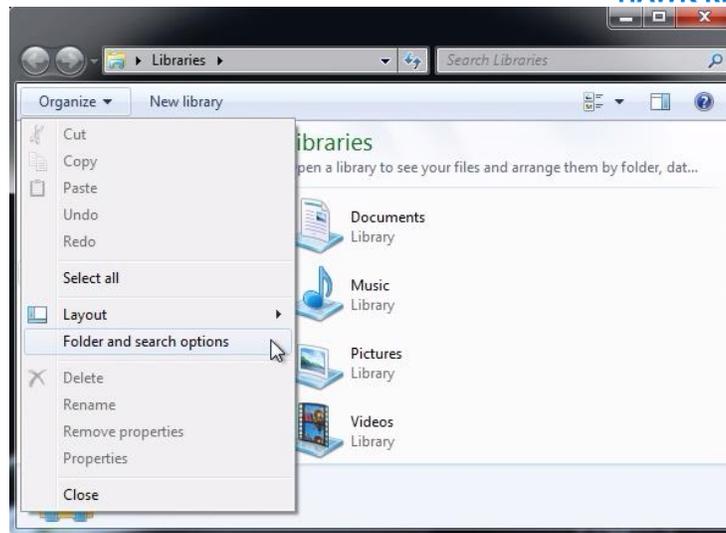

Data Files and Folder:

- C:\SOLIDWORKS Data
- C:\ProgramData\SolidWorks
- C:\ProgramData\DassaultSystemes

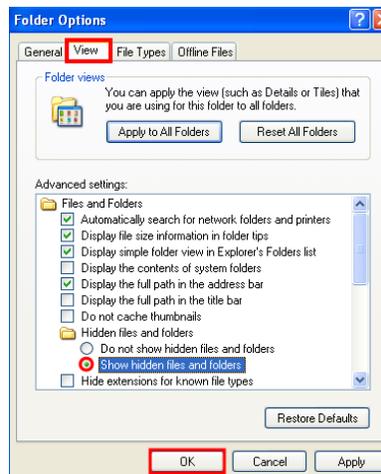

Appendix A: Showing Hidden Folders

By default, many file locations for SOLIDWORKS are in hidden folders. To be able to access these folders, you must set your system to show these items.

1. Start Windows Explorer.
2. Press **Organize>Folder and search options**.

3. Press **Tools, Folder Options** in the resulting window there will be a **View** Tab on this tab. Select the option **Show hidden files and folders** from the list of advanced settings. Press **OK**.

At this time, you will be able to see hidden folders; you may want to reset this option back to **Do not show hidden files and folders** after you have uninstalled SOLIDWORKS completely.

Appendix B: Accessing the Registry Editor

1. Click on the Start Menu and search for the following command "Regedit".
2. Click on the regedit.exe command in the search results.
